

# WatchGuard<sup>®</sup> XTM 330

WITH A NEXT-GENERATION XTM 330 SECURITY SOLUTION, YOUR NETWORK IS:

## RECOMMENDED FOR SMALL TO MIDSIZE BUSINESSES

WatchGuard XTM 330 appliances deliver a new class of performance-driven security for growing businesses. The XTM 330 offers up to 850 Mbps firewall throughput and security features including full HTTPS inspection, VoIP support, and optional application control.

## WHY BUY AN ALL-IN-ONE SOLUTION?

An all-in-one XTM network security solution integrates complete protection while slashing the time and cost associated with managing multiple single-point security products. All security capabilities work together for a holistic, comprehensive approach to network protection. Your IT staff has more time to focus on other areas of network administration, and your business saves money on support and hardware costs.

**“WatchGuard makes a great firewall and security appliance, and backs it up with tremendous and personal support.”**

## SECURE

- Application-layer content inspection recognizes & blocks threats that stateful packet firewalls cannot detect.
- Wide-ranging proxy protection provides robust security on HTTP, HTTPS, FTP, SMTP, POP3, DNS, TCP/UDP.
- A suite of security subscriptions boosts protection in critical attack areas for complete threat management.
- Optional Application Control keeps unproductive, inappropriate, and dangerous apps off-limits.

## FAST and EFFICIENT

- Up to 850 Mbps firewall throughput and up to 150 Mbps VPN throughput keep data moving.
- Aggregate throughput can reach 70 Mbps, even when security subscriptions are enabled.
- Seven 1-Gigabit Ethernet ports support high-speed LAN backbone infrastructures and gigabit WAN connections.
- Interactive, real-time monitoring and reporting – at no additional charge – give an unprecedented view into network security activity so you can take immediate preventive or corrective actions.
- Includes the “Pro” version of the Fireware XTM operating system for advanced networking features, including VLAN support, multi-WAN load balancing, and dynamic routing.
- Intuitive management console centrally manages all security functions.
- Role-based access control (RBAC) allows lead administrators to create custom roles for granular control.
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected.

## FLEXIBLE

- WAN and VPN failover increase performance, redundancy, and reliability.
- Multiple VPN choices (SSL and IPSec) for flexibility in remote access, including support for Apple iOS devices such as the iPhone, iPad, and iPod touch.
- To maximize port utilization, any of the 7 ports can be configured as Internal, External, or Optional.

## SCALABLE

- Add powerful security subscriptions to block spam, control dangerous and inappropriate application usage and web surfing, prevent network intrusions, and stop viruses, spyware, and other malware at the gateway.

## PREPARED FOR TOMORROW'S CHALLENGES

- Multi-layered, interlocking security protects the network while throughput remains high. No need to compromise protection for strong performance or vice versa.
- Advanced networking features ensure reliability and the flexibility to meet changing business requirements.
- Secure remote connectivity keeps mobile workforce online and productive.
- Monitoring and reporting tools, included at no extra cost, support industry and regulatory compliance, with drill-down functions that make it easy to pinpoint specific activities.
